SSV Works offers ALPINE Upgrades

Agoura Hills, CA (July, 5.2009) – SSV Works, the originator of Side by Side Vehicle audio systems, is pleased to announce they've teamed up with Alpine Electronics to make the best sounding Side by Side Vehicle systems sound better

Audiophiles can now order their SSV Works fiberglass speaker pods, subwoofer enclosures or complete systems equipped with Alpine components. The upgrade features Alpine Type-R 6.5" and 6x9" speakers and 10" Type-S subwoofers. 3, 4 or 5 speaker packages utilize Alpines PDX5 compact-digital true 5ch amp for the ultimate in output, clarity and tune ability.

The Type-R speakers provide powerful mid-bass and are acoustically accurate even at full volume without sacrificing quality. The Type-S woofer outputs loud, crisp, low frequencies and was designed for big boom in a small space. Space and power is a premium in a Side X Side making the PDX5 amplifier a perfect fit. It's ultra-efficient design allows high output with low waste consuming less power from your Side by Side Vehicle.

All SSV Works products are 100% fiberglass for the best sound quality and bass response. They are finished in a black texture coat to match factory textures and can be custom painted or wrapped to match any color scheme. SSV Works pods include stainless mounting hardware and step-by-step installation instructions

SSV Works products are available at www.SSVworks.com or from their nationwide network of authorized dealers.
